

Progress report from primary school Gandalwadi village (Patoda, MH, India)

This report includes change in school children's after advanced educational equipment's.

Following are the remarkable changes observed in the pupil attitude.

1. All school children have more attraction towards new learning system.
2. Attendance in school is more.
3. Learning faster
4. Concentration improvement.

Teachers observed the students are more interested when they are showing some educational clips (movies). They are concentrating more and understanding faster after use of computer in education system. Moreover, it is observed that there is improvement in attendance than previous year.

Furthermore, pupils learned basic part names like keyboard, mouse, monitor, etc.
